WE HAVE HEARD IT.

Mr. Editor: Have you not seen the challenge of the Waterbury Republican to State Highway Commissioner Macdonald to explain why the state lost \$20,000 by his inattention to the Norwich, October 19, 1909.

We have read it, and most of the remarks thereon. The Bulletin does not know of a word in the good roads law which would warrant Commission er Macdonald in making a private contract to build a \$30,000 road for any one on earth. He would not be justistate road and he is building it ac-cording to law, but there is no law by which he could build it with private funds. He knows this, and others will see that the way in which he is held to strict accountability under the law requires that he shall make no compromising alliances. And necause he nets according to law he is charged with having lost to the state \$30,000. Constance laughed nervously.
A little later a park policeman, who had been learning on the handle bars of his bicycle, saw a man running toward an automobile which stood before the house on the corner. The policeman saw him place a strange great bundle in the tonneau and spring to the wheel. There was the squeal of the spark-advance, the roar of the racing engine, the clack of the shift-lever and the crunch of the gears. The driver leaned forward, shifted to the high, threw in the clutch and was off at break-neck speed. But the policeman was feeling rather tired and decided not to give chase.—Boston Post.

Findings of Board of Pure Food and Drug Inspection, of the Department of Agriculture, Made Public. (Special to The Bulletin.)

Washington, Oct. 19.—The findings of the board of pure food and drug inspection, of the department of agriculture, in the matter of the prepara-tion and shipment of oysters, clams, and other shellfish, have just been made public by the secretary of agri-

A public hearing was held by the board on May 29, 1999. At this hear-ing, growers, packers, dealers, and the public were afforded an opportunity to be heard. The findings follow:

It is unlawful to ship or sell in in-terstate commerce oysters or other shellfish taken from unsanitary or polluted beds. The pollution of oysters with sewage can readily be detected longs-or used to belong-with break- by bacteriological examination, and fied under the law in accepting Mr. Plant's gift without first having the approval of the state, a thing he can only get when the legislature is in seasion. Ingredient which may render such articles injurious to health."

Such articles are likewise adulterated under section 7, in case of foods, because they consist "in whole or in part of a filthy, decomposed, or putrid animal or vegetable manner."

In order to prevent the possibility of contamination, it is desirable that such containers be sterilized before using. It is unlawful to ship or to sell in interstate commerce oysters or other shellfish which have been subjected to "floating" or "drinking" in brackish water, or water containing less salt than that in which they are grown. Such food is adulterated under section 7 of the law because a substance has been mixed and packed with it so as to reduce or injuriously affect its quality or strength." There can be no objection to "drinking" shellfish in unpolluted water of the same salt content as that from which they have been removed. Attention is called, however, to the dangers resulting from "drinking" shellfish near polluted fresh water streams and near other sources of pollution.

cleaning and chilling.

In view of the fact that the shipping season has begun and shippers will require several months to provide themselves with suitable containers for the shipment of shellfish out of contact with ice, no prosecutions will be recommended prior to May 1, 1910, for the shipment or sale in interstate commerce of oysters or other shellfish because of the addition of water caused solely by shipment in contact with ice. solely by shipment in contact with ice, T.
